

# PRODUCT DATASHEET LS VAL -1000/840/5/IP65

# LED STRIP VALUE-1000 PROTECTED | IP65 protected LED strips with 1000 lm/m for general applications

#### Areas of application

- General indoor illumination
- General outdoor illumination
- Private living areas

#### **Product benefits**

- Great scope of design options due to long and flexible LED strips
- Easy mounting on many smooth surfaces thanks to self-adhesive tape
- Suitable for use in damp conditions thanks to high type of protection
- Maximum flexibility due to large range of accessories
- Simple connection thanks to integrated cables on both sides

#### **Product features**

- Flexible and cuttable LED strip
- Smallest cuttable unit: 100 mm
- Lifetime (L70/B50): up to 20,000 h at Tc max.: 65°C
- Luminous flux: 1000 lm/m
- Color rendering index  $R_a$ : > 80
- Available with light color: Warm White, White, Daylight
- Type of protection: IP65
- Dimmable with suitable drivers, see also www.ledvance.com/dim

#### **TECHNICAL DATA**

#### Electrical data

| Nominal wattage           | 55.00 W              |
|---------------------------|----------------------|
| Construction wattage      | 55.00 W              |
| Nominal wattage per meter | 12 W <sup>1)</sup>   |
| Nominal voltage           | 24 V <sup>2)</sup>   |
| Input voltage range       | 2325 V <sup>2)</sup> |
| Reverse Voltage           | 25 V <sup>2)</sup>   |
| Type of current           | DC                   |
| Nominal current           | 1845.000 mA          |

1) Value based on first meter of the product

2) <sub>VDC</sub>

#### Photometrical data

| Total useful luminous flux [PICOS]   | 990 lm                |
|--------------------------------------|-----------------------|
| Luminous efficacy                    | 83 lm/W <sup>1)</sup> |
| Luminous flux                        | 4062 lm               |
| Luminous flux per meter              | 990 lm <sup>1)</sup>  |
| Luminous flux per module chain       | 4062 lm               |
| Color temperature                    | 4000 K                |
| Color rendering index Ra             | > 80                  |
| Light color LED                      | Cool white            |
| Light color (designation)            | Cool White            |
| Standard deviation of color matching | ≤6 sdcm               |

1) Value based on first meter of the product

# Light technical data

| Beam angle                         | 105 °    |
|------------------------------------|----------|
| Rated beam angle (half peak value) | 110.00 ° |

#### LED MODULE INFORMATION

| Number of LEDs per meter         | 60  |
|----------------------------------|-----|
| Number of LEDs per module        | 300 |
| Number of LEDs per smallest unit | 6   |

## **Dimensions & Weight**

| Length                  | 5000.00 mm          |
|-------------------------|---------------------|
| Length – smallest unit  | 100 mm              |
| Cable length            | 500.000             |
| Width                   | 10.00 mm            |
| Height                  | 4.10 mm             |
| Prewired                | Yes                 |
| Conductor cross section | 0.5 mm <sup>2</sup> |
| LED pitch               | 16.67 mm            |
| Short pitch             | No                  |
| Product weight          | 207.00 g            |

#### Colors & materials

#### Temperatures & operating conditions

| Ambient temperature range            | -20+40 °C <sup>1)</sup> |
|--------------------------------------|-------------------------|
| Maximum temperature at tc test point | 65 °C <sup>2)</sup>     |
| Temperature range in operation       | -20+65 °C <sup>3)</sup> |

1) Providing that temperature at Tc point is below max value during operation

2) Exceeding the maximum specified ratings can reduce expected life time or destroy the LED strip

3) At the T<sub>c</sub> point

#### Lifespan

| Nominal lamp life time | 20000 h |
|------------------------|---------|
|------------------------|---------|

# Capabilities

| Dimmable              | Yes 1) |
|-----------------------|--------|
| Dimming interface     | PWM    |
| Lowest bending radius | 30 mm  |
| Self-adhesive         | Yes    |

| Reverse polarity protection | Up to maximum 25 V <sub>DC</sub> |
|-----------------------------|----------------------------------|
|-----------------------------|----------------------------------|

1) Dimmable with suitable drivers, see also www.ledvance.com/dim

#### **Certificates & Standards**

| Approval marks – approval                | RoHS / CE / REACH   |  |
|--|---|--|
| Standards                                | Acc. to IEC 62471 / Acc. to IEC 60598-1 / Acc. to EN 60529 / Acc.<br>EN 62031 / Acc. to EN 55015 / Acc. to EN 61547 |  |
| Type of protection                       | IP65  |  |
| Energy consumption                       | 13.20 kWh/1000h <sup>1)</sup>   |  |
| Energy efficiency class                  | A   |  |
| Salt mist resistance acc. IEC 60068-2-52 | No  |  |
| UV resistance acc. IEC 60068-2-5         | Yes   |  |

1) Value based on first meter of the product

#### LOGISTICAL DATA

Temperature range at storage

-20...+85 °C

#### EQUIPMENT / ACCESSORIES

- Endcaps have to be ordered separately

#### ADDITIONAL PRODUCT INFORMATION

- All the technical parameters apply to the entire LED module. In view of the complex manufacturing process for light emitting diodes, the typical
  values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical
  parameters of an individual product; individual products may vary from the typical values.
- All LED strips have a self-adhesive tape on the reverse side. LED strips can be attached to suitable materials, e.g. aluminum profiles. The surface of the material must be free of grease, oil, silicone and dirt particles. The adhesive tape can be used only one time, if the LED strip will be removed from the mounting surface, there could be a damage of the LED strips and the mounting material. The surface temperature of the mounting material should be in the temperature range of 18°C...35°C. Complete adhesion takes up to 72 h.
- According IPC 6013C Use A the LED strips are designed for static installation. Vibrations, respective torsion and elongation/compression must be considered.
- In a wide temperature range operation field (e.g. outdoor installation) and a LED strip length with more than 2m suitable mounting surface is required. To avoid stress due to mismatch in expansion of the different materials, there should be an extra thicker adhesive tape between LED strip and mounting surface. Additionally, the LED strip should have enough space for thermal expansion at higher temperatures.
- Compensation due to chemical corrosion is excluded. A suitable protection against corrosive agents such as moisture, condensation etc. must be provided. Hydrogen sulfide (H2S) will cause an accelerated corrosion which leads to shortened lifetime or premature failure.
- IP00 LED strips have not surface coating. Consequently, they have no protection against contact and corrosion.
- Installation of the LED strip has to be done by a qualified electrician.
- Handle with care to avoid mechanical product damage
- If the maximum operating and storage temperature ratings will be exceeded, the expected lifetime will be reduced or even the LED strip will be destroyed. It is not allowed to operate the LED strip over the specified Tc temperature (acc. EN 60598-1 under steady state conditions)
- It is not allowed to exceed the maximum operation voltage. This could cause a hazardous overload and will destroy the LED strip.
- The applicable electrical and safety standards have to be maintained for a LED strip installations
- Pay attention on correct polarity. Incorrect polarity or wrong wiring can cause unpredictable permanent damage or even failure of the product.
- Galvanic Insulation between LED strip and mounting surface must be ensured. This Insulation is needed especially in the area of connections or cut ends.
- In installations of LED strips ESD safety must be taken in account. Adequate precautions during installation and operation for the products are required.
- LED strip can be operated only by a SELV LED driver, which comply with the applicable lighting standards and fits to LED strips rating. A safety
  operation of the LED strips require a SELV LED driver with an electronically stabilized power supply protection against short circuits, overload and
  overheating.
- To avoid a damage of the LED strip, the unmounted LED strip should be handelt and stored only in the original LEDVANCE packaging (wheel / ESD bag). Repacking is not allowed. Cutted IP 6x LED strips can be stored only with mounted endcaps.
