

LANmark-OF Splice Cassettes

LANmark-OF Splice Cassette Aluminum Protectors Small

Nexans Ref.: N890.096

- Splice cassette for management of splices
- Aluminum Protectors
- Small splice cassette

DESCRIPTION

Family of patch panel accessories for termination of cable when using fusion splicing techniques.

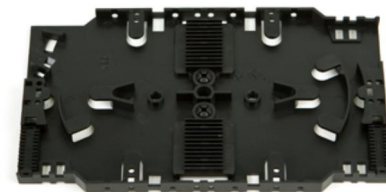

The cassette protects the fusion splices and holds them in position.

The cassettes with Aluminum protectors can only be used for Loose Tube cables, Micro-Bundle cables and LANmark-OF Maxistrip Pigtailed, i.e. fibres with a diameter of 250 µm. Aluminum protectors can NOT be used with LANmark-OF Tight Buffer cables and LANmark-OF Tight Buffer Pigtailed, i.e. fibres with a 900 µm coating.

The splice cassettes with Aluminum protectors have 24 splice positions.

The Nexans fibre panels can hold up to 4 splice cassettes and only the top splice cassette needs a cover.

The small splice cassettes (N890.095, N890.096 and N890.097) are compatible with the LANmark-OF Snap-In panels (N441.203 and N441.204) and the LANmark-OF ZD-boxes (N521.630 and N521.612).
